

Own your car. Not the lock-in.

Vehicle Ownership as a Service (VOaaS) — flexible, portable ownership built for the way young India actually lives.

Young professionals

Banks • OEMs • Dealers

Certified used marketplace

Confidential — Seed round

THE PROBLEM

A 7-year loan assumes your life stands still.

For 24–35 year-olds, it never does — yet financing punishes every change.

The young professional

24–35 · urban · financed

Changes city every 2–4 years

Switches employers frequently

Marriage reshapes vehicle needs

May move abroad on short notice

They want to own — **just not be trapped.**

What owning actually locks you into

Fixed for 5–7 years

One EMI, one bank, one contract — no easy off-ramp.

Fixed to one city

Relocating means re-registration, transfer tax, paperwork.

Fixed to one vehicle

Outgrown it in year 2? You still pay for it in year 6.

Painful, lossy exit

Resale bleeds 15–30%+ of value; the buyer sets the price.

India has gone fully flexible. Vehicle ownership hasn't.

~24M

vehicles sold / year

4.6M cars + 19.6M two-wheelers (FY25)

28

median age

one of the world's youngest workforces

~75%

of vehicles bought on finance

yet locked into rigid multi-year loans

Everything became a subscription

- ✓ Cities changed every 2–4 years
- ✓ Jobs switched, marriage delayed
- ✓ Homes rented, not bought
- ✓ Phones, OTT, gym, software — all on-demand
- ✓ EV shift makes today's vehicle tomorrow's regret

Buying a vehicle still means

- ✗ A 5–7 year loan you can't pause
- ✗ One city — transfer is a bureaucratic ordeal
- ✗ One vehicle, whatever life throws at you
- ✗ Difficult resale at a steep discount
- ✗ High depreciation you absorb alone

THE INSIGHT

Everyone finances the vehicle. Nobody finances the flexibility.

Each player optimises a single transaction. None owns the customer across their mobility life.

THE MISSING LAYER

Portable, continuous ownership

An ownership account that follows the customer — across vehicles, cities and life stages.

The opportunity isn't financing cars.

It's owning the ownership journey.

THE SOLUTION

Flexible Ownership as a Service

One relationship. Multiple vehicles. Zero lock-in — ownership that bends with your life instead of breaking it.

TODAY — THE RIGID LOOP

Need a vehicle

Take a 7-year loan

Life changes

Keep paying anyway

Sell at a loss

Start over

SIMPLYDRIVE — THE CONTINUOUS LOOP

Need a vehicle

Choose an ownership plan

Drive & build equity

Move · swap · pause · upgrade

Ownership continues

Buy out or keep flexing

THE PRODUCT

Three ways ownership follows you — not the other way around.

FlexOwn

Own on your terms

- ✓ Own a vehicle on a monthly plan
- ✓ Pause or return anytime
- ✓ Resume ownership later — equity intact

FlexSwap

Upgrade as you grow

- ✓ Bike → Car · Hatchback → SUV
- ✓ ICE → EV in a tap
- ✓ Upgrade or downgrade with life stage

FlexMove

Move cities, keep owning

- ✓ Drop your vehicle in city A
- ✓ Receive an equivalent in city B
- ✓ Payments & equity continue seamlessly

Your ownership follows you — **not your vehicle.**

THE DIFFERENTIATOR

Mobility EquityTM

We don't call it an EMI. Every payment builds a visible, portable equity balance the customer owns inside the SimplyDrive ecosystem.

Equity that compounds, not depreciates

Payments accrue toward upgrades & buy-outs — value the customer can see and use.

Portable across vehicles & cities

Carry your balance from a bike to a car, from Bangalore to Pune.

A reason to stay for a decade

Equity turns a one-time loan into a lifetime ownership relationship.

Illustrative in-app view

HOW IT WORKS

The vehicle can change. The ownership account never does.

1

Choose & get approved

Pick a vehicle; instant credit decision via bank/NBFC partners.

2

Delivery & drive

Doorstep delivery; insurance & maintenance bundled in.

3

Monthly ownership payment

Every payment builds Mobility Equity™.

4

Life changes → flex

Swap, pause, move city or upgrade — in-app.

5

Marketplace

Returned vehicles re-enter as certified used inventory.

6

Ownership continues

The account persists; the journey compounds.

One ownership account → **many vehicles, many years, many transactions.**

One customer. A lifetime of revenue streams.

Every vehicle a customer touches creates **multiple lifetime transactions** — not one.

A loan is one transaction. An ownership account is many.

Traditional car loan

- ✗ 1 vehicle · 1 financing event
- ✗ Ecosystem earns once, then goes silent
- ✗ Customer churns to resale — alone
- ✗ Relationship ends at ~year 5

SimplyDrive account

- ✓ 3–4 vehicles over 8–10 years
- ✓ Recurring payments + swaps + services
- ✓ Marketplace re-monetises every return
- ✓ Relationship compounds, rarely ends

Lifetime value per customer

indexed · illustrative

3–4×

vehicles per account

~8–10 yr

relationship horizon

70–80%

revenue recurring

Every return

re-monetised via marketplace

A vast, financed, flexibility-starved base.

TAM

~24M vehicles / yr

Every new personal vehicle financed in India — 4.6M cars + 19.6M two-wheelers (FY25).

SAM

~6–8M vehicles / yr

Urban, financed 24–40 y/o in the top 25 cities who churn jobs & cities.

SOM (5-yr target)

**100k+ ownership
accounts**

₹500 Cr+ GMV · 50k+ vehicles managed · 25 cities.

Adjacent pools we unlock: **vehicle financing, insurance, maintenance, used-car resale & EV charging.**

COMPETITIVE WHITESPACE

We're not another car loan or subscription. We're portable ownership.

	Ownership	Flexible exit	City transfer	Upgrade	Used marketplace	Ownership equity	Pause payments
Traditional loan	✓	✗	✗	✗	✗	—	✗
Subscription (Zoomcar/Revv)	✗	✓	—	✓	✗	✗	✗
Rental	✗	✓	✗	—	✗	✗	✗
Used-car marketplace	✓	✗	✗	✗	✓	—	✗
SimplyDrive	✓	✓	✓	✓	✓	✓	✓

✓ Full — Partial ✗ None

Only SimplyDrive ticks every box — **we replace rigid ownership, not car loans.**

Anyone can lease a car. Very few can orchestrate ownership.

Technology

The ownership operating system

- ✓ Portable ownership ledger
- ✓ Per-customer equity & vehicle history
- ✓ Residual-value engine
- ✓ Dynamic, swappable contracts

Network

A supply web that compounds

- ✓ OEMs · dealers · service centres
- ✓ Banks & NBFCs for credit
- ✓ Insurance partners
- ✓ Certified used marketplace

Data

A proprietary flywheel

- ✓ Real residual values
- ✓ Upgrade & migration patterns
- ✓ Utilisation & credit quality
- ✓ Sharper pricing over time

The moat isn't one vehicle — it's the **compounding system that connects every player to the customer for life.**

ROADMAP

From a Bangalore bike pilot to India's mobility OS.

5-YEAR TARGETS

VISION

Become India's operating system for personal mobility.

Start with flexible ownership. Then own the entire mobility lifecycle — across two-wheelers, cars, EVs, commercial and corporate fleets.
